

THE SECRET NEXT DOOR

Figma Build Sheet — screen-by-screen UI specification (mobile web app, 390 × 844)

This sheet tells you exactly what to put on every screen in Figma: the background, the texts (copy you can paste), the buttons, the colours, and where each button goes. Build the screens in the order below. First set up the Design System (Part 0) once, then reuse it on every screen.

Twine = the flow (logic). Figma = the look (UI). The button texts here match the Twine story word for word, so the two deliverables tell the same story.

How to use this build sheet

Steps

- 1. First, build the Design System in Part 0 (colours, fonts, components). Do this only once.
- 2. Then build the screens from Screen 1 to Screen 17, in order. Copy the texts straight from this sheet.
- 3. Then open the Prototype tab in Figma and draw the links from Part 2 (for example 1 -> 3, and 9 -> 11 for the correct answer, 9 -> 10 for a wrong answer). Now you have a clickable demo.

Two important notes

- Do not show the words “(correct)” and “(wrong)” in Figma. They are only notes for you. The flow already shows which answer is right: the correct answer goes to the Fact screen (9 -> 11), and a wrong answer goes to the Try Again screen (9 -> 10).
- For the demo, one full loop is enough (Saint Cecilia, Screens 7-13).

Why one loop is enough

All five paintings use the same seven screens (7 = find it, 8 = it speaks, 9 = question, 10 = try again, 11 = fact, 12 = church, 13 = map). So you do not need to design 5 × 7 = 35 screens from zero. Design the loop once for Saint Cecilia. Then either keep it as it is for the demo, or duplicate Screens 7-13 for the other four paintings and change only four things in each copy: the image, the question, the fact, and the church. Everything else (layout, colours, components) stays the same.

PART 0 — Design System (set this up first)

This is for Ksenia: you can use any other design system if you want. it is up to you. you can change the section below. This is just an idea😊

Style direction: “Midnight Nocturne” — a dark, cinematic look. Deep indigo background, electric cyan and warm amber accents, and frosted-glass cards with a soft glow.

Colours (hex)

- Background — a deep indigo gradient from #0B1026 to #161B3A to #1E2150. Put this on the phone; it is the base of every screen.
- Page behind the phone (outside the frame): #05060F.
- Glass surface (cards / chips) — white at 6% opacity with a background blur. This makes the frosted-glass look.
- Glass border — white at 14%, 1 px line on the glass parts.
- Cyan (main accent): #5EE0E6 — primary buttons, lit map dots, links, key words, the speaker icon.
- Blue (second accent): #7B9BFF — used together with cyan in the button gradient.
- Amber (warm accent): #F5B85C, and soft amber #F3D9A6 — only for the PAINTING’s voice text.
- Ink (main text): #EAECFF (a cool white).
- Muted text (secondary): #9AA0C7.
- Unlit map dot: white at 16%.
- Photo overlay: a dark indigo gradient, light at the top down to #07091E at the bottom, so text stays readable.

Fonts

- Display / headings — a serif font (e.g. Playfair Display or Cormorant Garamond). Gives the old, museum feeling.
- H1 = 32 pt · big lines = 24 pt · used for titles and key sentences.
- Body / UI — a clean sans font (e.g. Inter). Body = 16 pt · Caption = 13 pt · Button = 16 pt semibold.
- Two voices: the PAINTING speaks in serif italic, soft amber #F3D9A6 (18 pt). The GUIDE / app speaks in sans, cool white #EAECFF (16 pt). Keep this rule everywhere.
- Big title (“The Secret Next Door”) — serif with a cyan → amber gradient fill.

Reusable components (make once, use on every screen)

- Primary button — gradient fill from cyan #5EE0E6 to blue #7B9BFF, text #091029 (dark navy), pill shape (radius 28), height 52, full width, with a soft cyan glow under it.
- Secondary button — frosted glass (white 5%), 1 px cyan border, cyan text, same size.
- Choice button — glass (white 6%), 1 px white-14% border, ink text, radius 16, height 56, text aligned left, full width. On hover the border turns cyan with a glow. Used for answers.
- Fact card — glass (white 7%), 1 px white-14% border, radius 20, padding 20, soft shadow, with a small cyan label on top (for example “WELL SEEN”).
- Progress chip — a small glass pill, text like “1 / 5” in cool white, with a tiny cyan dot that glows. Top-left corner.

- Subtitle bar — bottom of screen, dark gradient behind it, holds the spoken text + a small cyan speaker icon.
- Map dot — 14 px circle. Off = white at 16%. Lit = cyan #5EE0E6 with a soft glow. The final map also has thin cyan lines that connect the dots.

Layout rules

- Frame size: 390 × 844 (iPhone). Side margins: 24 px. Gap between blocks: 16 px.
- Every screen: the indigo gradient background OR a photo with the dark gradient overlay, so text is always readable.

PART 1 — Screens (build in this order)

SCREEN 1 — Street Hook *(Twine: P0StreetHook)*

Frame: 390 × 844, mobile

Background: Full-photo of a Bologna street wall with an old poster. Dark gradient overlay at the bottom.

Elements (top → bottom):

- Poster image in the centre: a sad woman (Saint Cecilia detail) looking up at the sky.
- Handwritten line on the poster (serif italic, cream): “Everyone walks past me. Will you?”
- A small, sharp QR code in the bottom-right corner of the poster.
- Small caption under the poster (caption, muted): “Via Zamboni — a street you pass every day.”

Buttons:

- Primary: “Scan the QR code”
- Secondary / ghost: “Keep walking”

Goes to: “Scan the QR code” → Screen 3. “Keep walking” → Screen 2.

Notes: This is the start frame. Keep it cinematic: photo first, very little UI.

SCREEN 2 — She Follows You *(Twine: P0Walkaway)*

Frame: 390 × 844, mobile

Background: Same street, darker. The same woman’s face is repeated smaller, two or three times, down the wall.

Elements (top → bottom):

- Big line over the wall (serif italic, cream): “You walked past me. Everyone does.”
- Smaller line below (sans, muted): “I am only three minutes from here. I can wait a little more.”
- A small map pin chip: “Pinacoteca — 3 min”.

Buttons:

- Primary: “Go back and scan the code”

Goes to: “Go back and scan the code” → Screen 3.

Notes: Shows the city itself pulling the visitor back — no fake phone notification.

SCREEN 3 — The Way In *(Twine: P1Threshold)*

Frame: 390 × 844, mobile

Background: Almost black (the phone has just scanned). A glowing cyan line runs along the screen, like a route on a map.

Elements (top → bottom):

- Centre: a thin glowing gold line / arrow on the screen, pointing the way forward.
- Subtitle bar (serif italic, painting voice): “You came. Follow me. I am only around the corner.”
- Small label top: “Pinacoteca Nazionale — 3 min”.

Buttons:

- Primary: “Step inside”

Goes to: “Step inside” → Screen 4.

Notes: Dark and quiet on purpose. The gold line is the only bright thing.

SCREEN 4 — Welcome + Language *(Twine: P2Inside)*

Frame: 390 × 844, mobile

Background: A dim photo of a quiet museum hall with light on the floor. Dark overlay.

Elements (top → bottom):

- H1 (serif, cream): “Welcome.”
- Voice line (sans, guide): “Before I show you anything — what language do you think in?”
- Tiny note (caption, muted): “No app to download — this runs in your browser.”

Buttons:

- Four choice buttons in a row/grid: “English” · “Italiano” · “Türkçe” · “+ more”

Goes to: Any language button → Screen 5.

Notes: This replaces the old reception-desk idea: the guide’s voice does everything.

SCREEN 5 — The Mission *(Twine: P3Mission)*

Frame: 390 × 844, mobile

Background: Dark background. A faded map of Bologna shows softly behind the text.

Elements (top → bottom):

- H1 (serif, gold): “The Secret Next Door”
- Body (sans, cream): “5 paintings in this building were taken from 5 real churches across Bologna. Find them all, and you will understand the secret.”

Buttons:

- Primary: “Show me the map”
- Secondary: “Start now”

Goes to: “Show me the map” → Screen 6. “Start now” → Screen 7.

Notes: Sets the goal in one clear sentence.

SCREEN 6 — Map of Exiles (empty) *(Twine: P4MapIntro)*

Frame: 390 × 844, mobile

Background: A stylised dark map of Bologna.

Elements (top → bottom):

- Five map dots — all unlit (white at 16%). One dot pulses softly (use the lit-dot cyan glow).
- Top chip (progress): “0 / 5 homes found”.
- Caption (muted): “Every painting you wake up adds its lost church here.”

Buttons:

- Primary: “Follow the light”

Goes to: “Follow the light” → Screen 7.

Notes: The empty map is the promise. It will fill up screen by screen.

SCREEN 7 — Find the Painting *(Twine: PAINT1Approach)*

Frame: 390 × 844, mobile

Background: Dim background with a small wayfinding widget (a simple map / arrow to a room).

Elements (top → bottom):

- Small map/arrow card: “Room 24”.
- Voice line (sans, guide): “Look for a woman holding a small organ, with four people around her. She is the one looking up.”

Buttons:

- Primary: “I am in front of her”

Goes to: “I am in front of her” → Screen 8.

Notes: Wayfinding step — connects the digital guide to the real room.

SCREEN 8 — Painting Speaks *(Twine: PAINT1Story)*

Frame: 390 × 844, mobile

Background: Full image of the painting (Ecstasy of Saint Cecilia). Dark gradient at the bottom.

Elements (top → bottom):

- Top-left: progress chip “0 / 5”. Top-right: a small audio / pause icon.
- Subtitle bar (serif italic, painting voice) with a small speaker icon: “Hello. I am Saint Cecilia. Raphael made me five hundred years ago. I lived in the church of San Giovanni in Monte, only a few streets away. Then men took me down and carried me here.”
- Last line of the subtitle: “But look at me carefully — there is something I want you to find.”

Buttons:

- Primary: “Look closer”

Goes to: “Look closer” → Screen 9.

Notes: The painting talks in first person (serif italic). Voice + text play together.

SCREEN 9 — Look Closer (question) *(Twine: PAINT1Question)*

Frame: 390 × 844, mobile

Background: A zoom into the bottom of the painting (her feet, with broken instruments on the ground).

Elements (top → bottom):

- Prompt (serif, cream, top): “Look at the ground, by her feet. What do you see?”
- Small hint (caption, muted): “Now look at the real painting on the wall.”

Buttons:

- Choice button: “Broken musical instruments” (correct)
- Choice button: “A basket of flowers” (wrong)
- Choice button: “Some gold coins” (wrong)

Goes to: “Broken musical instruments” → Screen 11. Other two → Screen 10.

Notes: Do NOT show the words (correct)/(wrong) in Figma — that is only a note for you. The branching shows it.

SCREEN 10 — Try Again *(Twine: PAINT1Retry)*

Frame: 390 × 844, mobile

Background: Same zoomed detail, with a soft cyan glow on the correct spot.

Elements (top → bottom):

- Message card (sans, guide): “Not quite. Look once more — near her feet. What is broken on the ground?”

Buttons:

- Primary: “Look again”

Goes to: “Look again” → Screen 9.

Notes: Kind, no punishment. Just sends the visitor back to look.

SCREEN 11 — Fact Card *(Twine: PAINT1Fact)*

Frame: 390 × 844, mobile

Background: Dim painting in the background. A fact card sits in the centre.

Elements (top → bottom):

- Fact card, with a small cyan label “WELL SEEN”.
- Line 1 (serif italic, painting voice): “Yes — broken instruments. I let the music of the world fall, because I heard the music of heaven. That is why I look up.”
- Thin divider line (gold).
- Line 2 (sans, guide): “Almost every painting here was carried from a church across the city. You are standing in the memory of a whole city.”

Buttons:

- Primary: “Bring her home”

Goes to: “Bring her home” → Screen 12.

Notes: Reward for looking. First the painting’s meaning, then the surprising museum fact.

SCREEN 12 — Church Unlocked (*Twine: PAINT1Church*)

Frame: 390 × 844, mobile

Background: A warm photo of the church San Giovanni in Monte.

Elements (top → bottom):

- Info card over the photo: church name “San Giovanni in Monte”, a pin “6 min walk”, and a line (serif italic): “The wall where I hung is empty now.”
- Small animation note: one map dot lights up cyan in the corner.

Buttons:

- Primary: “See it on the map”
- Secondary: “Find the next painting”

Goes to: “See it on the map” → Screen 13. “Find the next painting” → Screen 7 (or Screen 14 in the short demo).

Notes: This is the emotional pay-off: the painting gets its home back.

SCREEN 13 — Map Update (1/5) (*Twine: PAINT1MapUpdate*)

Frame: 390 × 844, mobile

Background: The map again: one dot is now cyan with a line to its church; four dots stay unlit.

Elements (top → bottom):

- Top chip (progress): “1 / 5 homes found”.
- Caption (muted): “Four more are still sleeping out there.”

Buttons:

- Primary: “Next painting”

Goes to: “Next painting” → Screen 7 (full version) or Screen 14 (short demo).

Notes: Repeat Screens 7–13 for paintings 2–5 in the full version. For the demo, one loop is enough.

SCREEN 14 — The Reveal *(Twine: P_Reveal)*

Frame: 390 × 844, mobile

Background: The full map of Bologna. All five dots are cyan; glowing cyan lines connect every painting to its church — a web of light over the city.

Elements (top → bottom):

- Top chip: “5 / 5 homes found”.
- Big line (serif, cream, centre): “We are not old pictures on a wall. We are the memory of this city’s lost churches.”

Buttons:

- Primary: “See your result”

Goes to: “See your result” → Screen 15.

Notes: The climax. The whole city lights up at once.

SCREEN 15 — Share Card *(Twine: P_Share)*

Frame: 390 × 844, mobile

Background: Dark background.

Elements (top → bottom):

- A shareable result card: a small picture of the full glowing map + the line “I found the Secret Next Door.”
- Public counter (caption, gold): “You are the 2,148th person to find the secret this month.”

Buttons:

- Primary: “Share it”
- Secondary: “Keep it for myself”

Goes to: Either button → Screen 16.

Notes: Social layer: invites a friend, feeds the public counter.

SCREEN 16 — Homecoming *(Twine: P_Homecoming)*

Frame: 390 × 844, mobile

Background: A city map with the nearest church marked.

Elements (top → bottom):

- Voice line (serif italic, painting voice): “Now go outside. Stand in front of my church, lift your phone, and see me back in my old place, just for a moment.”
- Small note (caption, muted): “Tap to see the before / after photo of the wall.”

Buttons:

- Primary: “Take me to the nearest church”
- Secondary: “Maybe later”

Goes to: Either button → Screen 17.

Notes: This happens outside, at the real church: the phone shows the painting back on its now-empty wall (a before / after photo).

SCREEN 17 — The End *(Twine: P_End)*

Frame: 390 × 844, mobile

Background: A soft, dim photo of the quiet museum hall.

Elements (top → bottom):

- Closing line (serif italic, all voices): “They took us from the city, and the city forgot. But you remembered. Thank you for bringing us home.”
- Small note: the public counter ticks up by one.

Buttons:

- Secondary: “Start over”

Goes to: “Start over” → Screen 1.

Notes: Quiet ending — the room no longer feels empty.

PART 2 — Prototype wiring (quick map)

In Figma, open the Prototype tab and draw these connections (On tap → Navigate to). Use a gentle “Dissolve”, 300 ms.

- 1 → 3 (Scan) | 1 → 2 (Keep walking)
- 2 → 3
- 3 → 4
- 4 → 5 (any language)
- 5 → 6 (map) | 5 → 7 (start now)
- 6 → 7
- 7 → 8
- 8 → 9
- 9 → 11 (correct) | 9 → 10 (wrong)
- 10 → 9
- 11 → 12
- 12 → 13 (map) | 12 → 7 full / 12 → 14 demo (next painting)
- 13 → 7 full / 13 → 14 demo
- 14 → 15 → 16 → 17 → 1

Scope tip

For the demo you only need ONE full painting loop (Screens 7–13 for Saint Cecilia). To show the full idea, duplicate Screens 7–13 for paintings 2–5 (Conversion of Saint Paul, Investiture of Saint William, Stories of Saint Anthony Abbot, and Massacre of the Innocents) and change only the image, the question, the fact, and the church. Everything else (layout, colours, components) stays the same.
